

Subject : 2301CS401- Database Management System -II

Faculty: Prof. Firoz A Sherasiya

Sr.	Unit	Questions	Marks	BL	CO
1	4	What is MongoDB? What are the features of MongoDB?	3/4	4	U
2	4	Explain different types of NoSQL database.	3/4	4	U
3	4	Write differences between MongoDB and RDBMS.	3/4	4	U
4	4	Why MongoDB is the best NoSQL database?	3/4	4	U
5	4	When to use MongoDB?	3/4	4	U
6	4	Define Database, Collection, Documents and Field.	3/4	4	U
7	4	What are the different datatypes of MongoDB?	3/4	4	U
8	4	How does MongoDB store the data?	3/4	4	U
9	4	Define JSON with the help of example.	3/4	4	U
10	4	Explain updateOne and updateMany with the help of example.	3/4	4	U
11	4	Explain OBJECTID (Primary Key) with the help of example.	3/4	4	U
12	4	How does a collection differ from a table?	3/4	4	U
13	5	Explain Indexes in MongoDB with the help of example.	3/4	5	U
14	5	Explain Aggregation Pipeline in MongoDB?	3/4	5	U
15	5	Explain Embedded Documents with the help of example.	3/4	5	U
16	5	Explain schema validation with the help of example.	3/4	5	U
17	5	Explain Cursor in MongoDB with the help of example.	3/4	5	U
18	5	Explain REGEX with the help of example.	3/4	5	U
19	5	Explain aggregation in MongoDB with the help of example.	3/4	5	U
20	5	Explain time series data with the help of example.	3/4	5	U
21	5	Explain BASE Theorem.	3/4	5	U
22	5	Explain CAP Theorem.	3/4	5	U
23	5	Explain replication and Sharding.	3/4	5	U

* Note: Other than the above question, there may be MongoDB queries worth 3, 4, or 7 marks.

BL Level: Bloom's Taxonomy
R: Remembrance U: Understanding A: Application
